

Seaport-e: Team Members & Experience

Michael-Bruno is proud of its professional team members and the vast experience they bring to our Seaport customers, including:

Ahtna Government Services Corp www.ahtnagov.com

Established in 1999, Ahtna Government Services Corporation (Ahtna) is a wholly owned subsidiary of Ahtna, Incorporated, an Alaska Native Corporation. Having successfully graduated from the 8(a) program in December 2008, Ahtna provides high quality services worldwide and is CPUC-certified. Ahtna is one of the fastest growing small business firms in the United States. A multidisciplinary consulting firm with offices throughout the United States, Ahtna provides comprehensive general construction; construction management; engineering; environmental engineering and remediation; professional and staffing services; and program management services. Primarily, Ahtna serves Federal government clients, and as such, has attained a thorough knowledge of federal contracting requirements.

core 180, Inc www.core180.com

Core180 is a global systems integrator and project management firm with deep experience creating and managing sophisticated telecom and IT network solutions for U.S. government agencies within the U.S. and abroad in Europe, the Middle East and Asia, including Department of Defense, Civil, and Intelligence agencies. We partner with trusted, agile and best-of-breed vendors who possess the same level of experience and commitment to your success – both in the field and on your bottom line. The company was founded in 2006.

Envistacom, LLC www.envistacom.com

Headquartered in Atlanta, Envistacom is a privately-owned technology company providing end-to-end communications and networking solutions to defense, government and commercial enterprises. Their reputation is built on a solid foundation of superior customer service coupled with creative innovation and technical excellence. Envistacom designs and upgrades telecommunication networks with reliability in mind, and implement the security protocols that operations require, complying with regulations. We have assembled an expert team, amassing years of field and data-center experience, to test, manage and monitor satellite, wireless and terrestrial telecommunication networks alike.

IAP World Services, Inc www.iapws.com

IAP is a leading provider of global-scale logistics, facilities management, and advanced professional and technical services. We are the go-to company for governments, the military, commercial enterprises, and humanitarian organizations. IAP's mission is clear: Success through Service — using a global network of integrated capabilities to deliver what we promise. They serve many government sectors including: Aviation; Emergency Response; Expeditionary Solutions; Facilities Management and Maintenance; Healthcare

Services; Information Technology/Communications; Logistics/Supply Chain; and Power Solutions.

Merrick and Company www.merrick.com

Specializing in project management and oversight in the areas of military construction, the team members have worked with AFRICOM, DISA, DoDEA, NAVFAC, NATO, NEX, SPAWAR, USACE and USAID.

Shumaker Consulting Engineering www.shumakerengineering.com

Shumaker Consulting Engineering and Land Surveying, P.C. is a certified Women-Owned Business Enterprise. They offer professional services to public and private sector clients throughout the northeastern United States. Shumaker provides engineering, land surveying, and construction review services for projects involving new construction, renovation, and remediation of public and private buildings and the infrastructure systems that support them, such as roadways and bridges, potable water, stormwater, sewage, and solid waste. The company was established in 1956.

Wittenberg Weiner Consulting, LLC www.ww-consult.com

WWC supports US Federal agencies in the areas of mission management, strategic communications, regulatory compliance, metrics, policy design, financial management, budget design and execution, and legislative affairs. Their roots at the White House Office of Management and Budget inform our ability to communicate effectively across agencies and with the executive branch. Around the globe, WWC analysts manage the business supporting operations, allowing operators to focus on their core mission. On military installations in Africa, Europe, the Middle East and Stateside, our analysts support change and mission management, continuous process improvement, government finance, AT/FP policy, emergency management, manpower and ERP.
